

International Patent Application

Title: "Knife Holder for Comminution Devices"
Applicant: Doppstadt Calbe GmbH, Barbyer Chaussee 3, D
39240 Calbe
Our Ref.: Dop 2005/08 PCT

Fig. 1

Abstract

The invention refers to a knife holder for comminution devices, comprising a tooth body (1) which can be fastened on a comminution cylinder or the like, and at least one knife (2), the knife (2) being able to be arranged positive-locking on the tooth body (1).

The invention is characterised by the fact that a knife receiving device is provided, the knife receiving device (3) is designed as recess (4), and, seen from the side, has the shape of a J, and the recess (4) is designed wedge-like or conically, preferably tapering-off to the outside in such a way that recess surfaces (4/1, 4/2) occur.
